Environmental Policy

Belenus Property Services Ltd believe that businesses are responsible for achieving good environmental practice and operating in a sustainable manner.

We are therefore committed to reducing our environmental impact and continually improving our environmental performance as an integral and fundamental part of our business strategy and operating methods.

It is our priority to encourage our customers, suppliers and all business associates to do the same. Not only is this sound commercial sense for all, it is also a matter of delivering on our duty of care towards future generations.

Our policy is to:

- Wholly support and comply with or exceed the requirements of current environmental legislation and codes of practice.
- Minimise our waste and then reuse or recycle as much of it as possible.
- Minimise energy and water usage in our buildings, vehicles and processes in order to conserve supplies, and minimise our consumption of natural resources, especially where they are non-renewable.
- Operate and maintain company vehicles (where appropriate) with due regard to environmental issues as far as reasonably practical and encourage the use of alternative means of transport and car sharing as appropriate.
- Apply the principles of continuous improvement in respect of air, water, noise and light pollution from our premises and reduce any impacts from our operations on the environment and local community.
- As far as possible purchase products and services that do the least damage to the environment and encourage others to do the same.
- Assess the environmental impact of any new processes or products we intend to introduce in advance.

Green Waste Recycling

BPS actively support Devon County Council in their Ticket Scheme recycling programme and work to ensure that ALL of our green waste is returned to facilities that actively promote and manage the recycling of garden waste.

Re Use of Materials

BPS will where ever possible reuse materials reclaimed from work in an effort to reduce or remove the use of new materials. Such efforts may include the use of timber, blocks, plasterboard and other associated building items to reduce waste.

Bat Safe

The environmental impact of building works to Bat colonies is a respected consideration by BPS. To ensure the correct environment is maintained where ever possible the use of Bat Safe materials in roofing will always be considered and used appropriately.

For any issues related to our Environmental Policy please contact:

Mick Cook

Managing Director
